

LUKA JEVREMOVIC

Applications Developer. 2st year student in computer science

PROJECTS

Feb 2026 – Aug 2026

Apps Team

Host: John Riordan

As part of the Apps Team, a dynamic team of around 20 apprentices and experienced professionals, I develop modern web applications. In the first year of my IT apprenticeship, I actively support the team on front-end projects. I work extensively with Next.js. In an agile environment, I contribute to client projects with high quality standards and continue to develop my skills in modern web development on a daily basis.

Aug 2025 – Jan 2026

IT Onboarding

Host: Margherita Fasanella

The IT onboarding project gave me a grounding in the technical fundamentals of web development, including HTML, CSS, JavaScript, TypeScript and (Angular). During this project, I had the opportunity to create my own portfolio website and develop a small web application through productive teamwork. In the process, I became familiar with Swisscom's agile working processes, particularly Scrum, to ensure I was fully prepared for my future day-to-day work.

Aug 2025

First Steps

Host: Jonas Schweizer

During the First Steps programme, I was given an introduction to the basics and what was expected of me. I learnt about the key tools and received a range of introductory sessions. This is where I took the first steps of my apprenticeship, getting to know my mentor, my future colleagues and Swisscom.

SCHOOLDAYS

Monday

Technical school (BBW)

Tuesday

maturity school (BMS)

SKILLS

Webentwicklung	•HTML (experienced) • CSS (experienced) • JavaScript (experienced) • TypeScript(experienced)
